## AIM-

Introduction to windows form application design and properties associated with each control

- a. Tool box
- b. Property window
- c. Solution Explorer
- d. Server Explorer

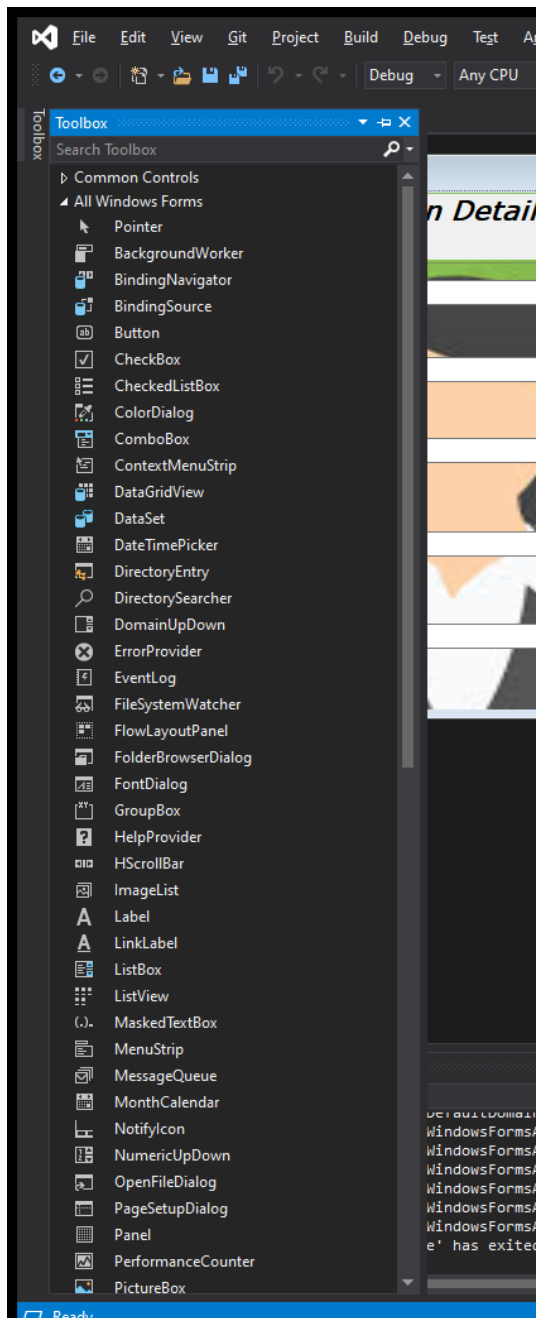

## Steps-

Creating a login form in visual basic

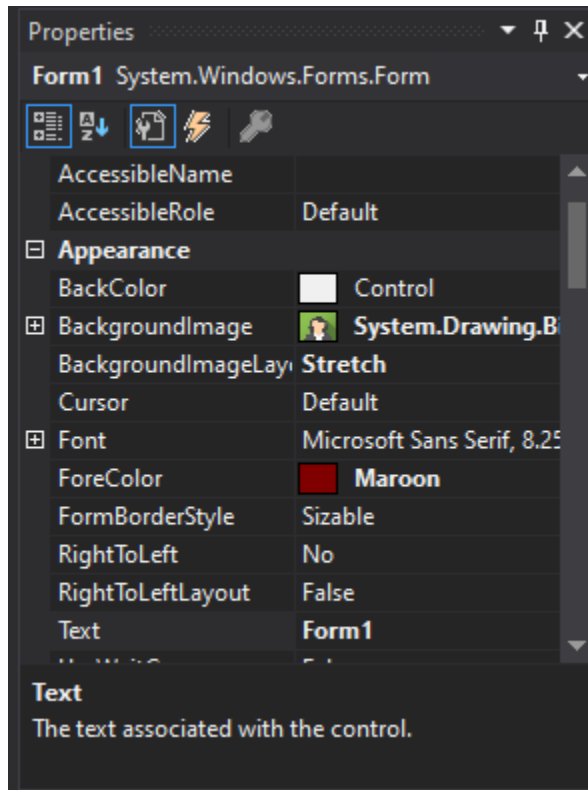

The screenshot displays a Windows Form application titled "Form1". The form has a green background and a central illustration of a person's head and shoulders. The title "Login Details" is centered at the top in a grey box. On the left side, there are five labels: "Open" (with a button), "Registration No.", "Fname", "Lname", "D.O.B", and "Branch". Each label is followed by a white text input field. The "Open" button is highlighted with a blue border. The form is designed to collect user login information.

## a. Tool box

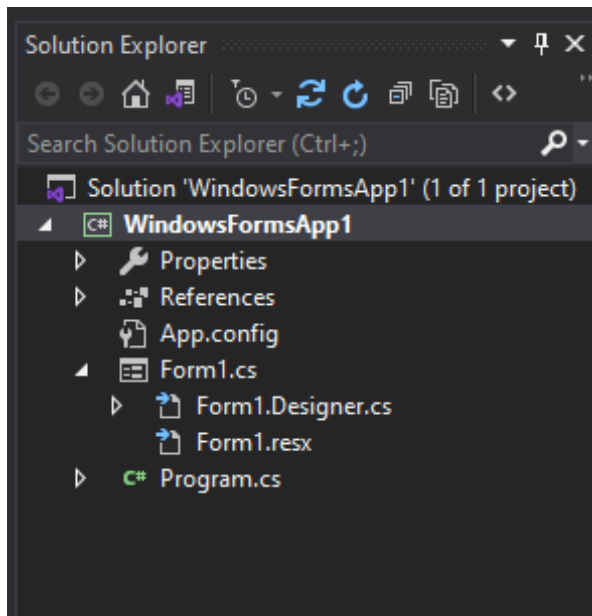

Tool box can be found on the left top corner of the menu

b. Property window

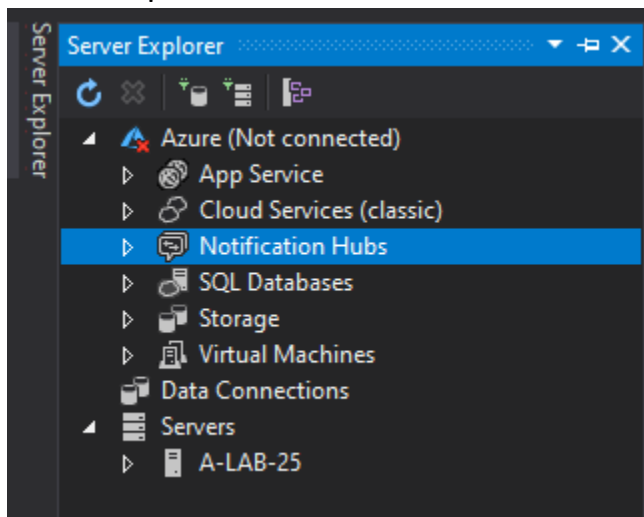

Property window can be found on the right down corner of the window

## Solution Explorer

Solution window can be found in right top corner of the window.

### c. Server Explorer

For accessing server explorer click on tools and then on connect to database and click it
